**Subject:** 04/11/2019 data for CTEH and summary table  
**Attachments:** Nashville Data 04112019.pdf

Hello,

Attached is the latest summary table. Because of the VIPER system logging the data more frequent than the default setting on the AreaRaes, we have thousands of points. And I double checked Unit 11, it appears he was working. Please let me know if you find any needed revisions, I didn't have a second pair of eyes on it...

I have the data for CTEH, but the spreadsheet is immense and not going to go through email. And you guys still can't accept zip files? I have several flash drives if we can transfer that way.

Thanks,  
Leslie
